EXPERIENCE

IT & Web Solutions Engineer

10/2025 – Present

GiqComp Solutions

Charlotte, NC

- Design, develop, and maintain responsive business websites using HTML, CSS, JavaScript, WordPress, Bootstrap, and Tailwind CSS.
- Configure domains, DNS, SSL certificates, hosting environments, and secure business email systems to support reliable technology services.
- Implement support portals, ticketing systems, scheduling platforms, and workflow automation to improve operational efficiency and customer service delivery.
- Deliver remote IT support, Microsoft 365 administration, endpoint configuration, system troubleshooting, and technology consulting for business clients.
- Assess technical requirements and recommend technology solutions that improve system reliability, security, business operations, and user experience.
- Integrate AI-powered automation, chatbot platforms, and virtual receptionist solutions to streamline business processes and enhance client engagement.

IT Support Technician

07/2024 – 10/2025

Mount Sinai South Nassau

Oceanside, NY

- Installed, configured, and deployed Windows and clinical endpoints through imaging, BIOS/UEFI configuration, testing, and provisioning workflows.
- Provided L1/L2 on-site and remote technical support via Zoom, Microsoft Teams, RDP, and Dameware, resolving 30+ weekly ServiceNow incidents and maintaining 95% SLA compliance.
- Administered Active Directory accounts, permissions, security groups, and distribution lists to support secure identity and access management.
- Managed Microsoft 365 services including Outlook, Teams, Exchange Online, and SharePoint configuration, maintenance, and troubleshooting.
- Diagnosed and resolved Windows and macOS issues, printer and scanner problems, DHCP/DNS connectivity issues, and application failures to restore service and improve system reliability.
- Deployed and supported Workstations on Wheels (WOWs) for Epic EHR access, Technical Dress Rehearsals (TDRs), and clinical operations.
- Supported server maintenance, OS patching, endpoint security controls, compliance requirements, and performance monitoring in collaboration with infrastructure teams.
- Partnered with IT and infrastructure teams on scripting, automation, technical documentation, and process improvements to enhance operational stability.

IT Support Associate
Research Foundation of CUNY

09/2022 – 07/2024

New York, NY

- Developed a Google Workspace reporting workflow that improved ticket resolution time by 50%.
- Deployed and supported 150+ Windows and macOS endpoints through imaging, configuration, and onboarding workflows.
- Diagnosed and resolved hardware, software, and account-related issues for 20+ users weekly.
- Administered Microsoft 365 applications including Outlook, Teams, and OneDrive for end-user support.
- Produced technical documentation and user guides to improve onboarding consistency and knowledge transfer.

IT Support Technician & Youth Counselor
Millennium Development

06/2017 – 09/2022

Brooklyn, NY

- Delivered daily technical support to 25+ users and workstations, ensuring reliable system performance.
- Implemented an asset-tracking system and preventive maintenance program, reducing device downtime by 35% and equipment discrepancies by 40%.
- Maintained technical documentation, inventory records, and support procedures to improve consistency and operational efficiency.
- Instructed youth in computer fundamentals, software applications, and introductory programming concepts.

IT Support Technician (Level 1 & Level 2)
Unibank S.A.

01/2013 – 06/2017

Port-au-Prince, HT

- Configured and deployed 1,500+ workstations annually, improving deployment efficiency by 40%.
- Resolved 30+ weekly incidents involving hardware, software, connectivity, and user access across 50+ branch locations.
- Administered Active Directory accounts, permissions, and security controls to maintain identity and access integrity.
- Troubleshoot TCP/IP, DHCP, DNS, and IP conflicts in Windows environments to restore network connectivity.
- Supported Microsoft Office and Outlook, resolving email and authentication issues.
- Trained junior IT staff and documented support procedures to improve team consistency and service quality.
